

Start your career in sustainable development!

The call for applications for the X13th edition of „Challenges of Sustainable Development in Poland” summer course is now open

Are you interested in sustainable development or corporate social responsibility and would you like to embark on a career in this field? Until 30 April 2010 you can apply for the 13th edition of „Challenges of Sustainable Development in Poland” summer course, run by Sendzimir Foundation and Centre for Systems Solutions in cooperation with University of Florida, AGH University of Science and Technology and Baltic University Programme. The course will take place in July 2010 (from 4th to 25th) in Polish Academy of Sciences Conference Centre in Mogilany near Cracow. Participants will consist of international, interdisciplinary group of students, NGO activists and scientists from Central and Eastern Europe and Baltic Sea region. The course will be held in English and the participation is free of charge. The applications in English should be sent to office@sendzimir.org.pl.

„Challenges of Sustainable Development in Poland” is an intensive, interdisciplinary course run by prominent Polish and international experts, covering topics such as environmental ethics, systems ecology, natural resources issues, environmental economics, sustainable social development or sustainable construction and architecture. Its program includes lectures, debates, workshops, simulation games, field activities and practical projects realized in cooperation with business sector and local communities. For many of the alumni the course serves as an entryway to a career in sustainable development.

During the previous editions of the course, students realized projects with such companies and communities as: IKEA Cracow, BP Poland, Hotel Sheraton Cracow, Bank of the Environmental Protection as well as Zawoja, Czeladź or Karpacz communes.
