

Baltic University Programme students' conference on Environmental Management Systems

Ostrava, Czech Republic, November 24 – 28th, 2010

The 2010 fall student conference of the Baltic University will focus on environmental management as a systematic approach to improved environmental performance. The conference will include lectures, practical work, discussion groups and excursions. It will touch on materials management, product eco-labelling, life cycle thinking, certification and EMS at companies, cities, universities and in your personal lives.

Participants will be asked to prepare themselves by investigating the performance of universities where they study and the cities they come from.

The deadline for student's applications, which should include a letter of motivation, is November 1st.

The BUP, with support from the Technical University of Ostrava, will cover all costs on place for all students (food and accommodation included). Travel costs will be the responsibility of the participants and their universities with a limited possibility to apply for the travel grant at the BUP Secretariat. For more information please visit: <http://www.balticuniv.uu.se/>

All BUP students, with a direction of studies including EMS or an interest for EMS, are welcome to apply!
